
“GEAR UP
BEFORE
YOU HIT
THE ROAD.”

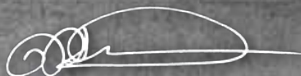

=====

MICK DOOHAN.
5 times 500cc World Champion.

"In a motorcycle crash, it takes as little as half a second for the road surface to tear your clothing to shreds and leave your body exposed to crippling injuries. Even a pair of denim jeans will disintegrate in just 0.6 of a second. Pants designed for riding will save your skin for around 3.5 seconds. Put simply, wearing the right safety gear can make all the difference between walking away from a crash or never riding again. So no matter where you ride, no matter what the speed, always make sure you gear up in the right jacket, helmet, boots, gloves and shoes. Otherwise you may as well be wearing nothing."
